

MasteryNet Learning Management System

is an easy-to-use, yet sophisticated online learning management system that administers and delivers any online course and administers off-line training events. It runs in your browser over any Internet connection. There is no new software to install and startup is immediate.

Launch and track any training

- Plays all SCORM-compliant content
- Plays all non-SCORM content ("SCORM-wrap" documents, videos, Powerpoints, Flash and more)

Role-based access policy – empower all training stakeholders

- Limit functions users can perform
- Total control over access

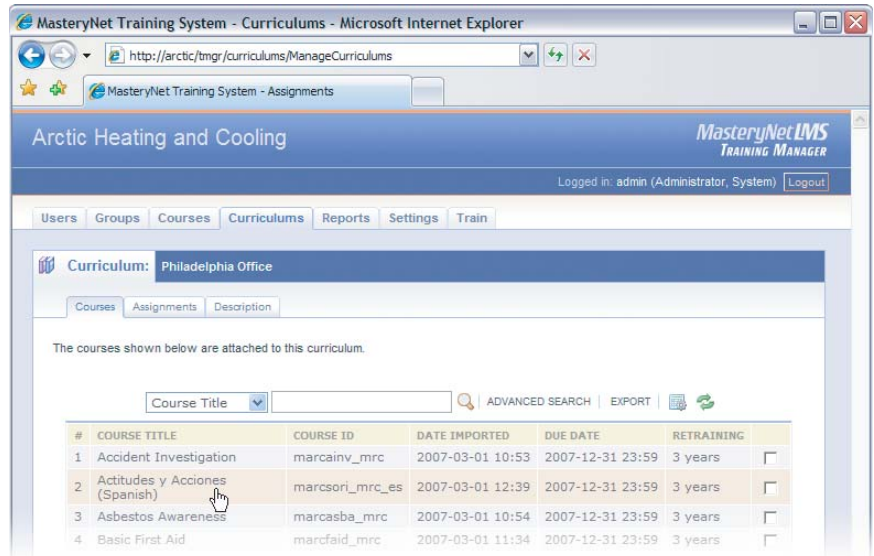

Dynamic Training Assignments – an instant boost to your productivity

- Simplifies assignment management
- Reduces time and costs by 90%

Flexible reporting – strengthens your control of the training process

- Selectively filter and summarize data
- Export to spreadsheets

MasteryNet LMS is provided to you through your own private Employer Portal. Branded with your own company logo, you simply link to it from your own website or from Mastery's subscriber access page. Mastery provides all of the hardware, network infrastructure and support services required. Your MasteryNet Employer Portal is hosted on our high-performance servers at a state-of-the-art Premiere Tier One data center.

With MasteryNet LMS you can:

- Administer your own web based training plans
- Create and manage training curriculums
- Manage users and departments
- Track training compliance and requirements
- Spend less time administering your training
